

the Nuage Signature™

Multi-purpose treatment table with integrated trolley

The groundbreaking Nuage Signature all-electric lift combined with a patent pending integrated trolley workstation is the perfect solution for spas big on treatments but small on space. The trolley tucks neatly under the Nuage when not in use, yet easily slides out and into position to serve as a workstation for facials and other treatments. The Nuage Signature table features the Electra-Glide™ lift actuators, the quietest, smoothest, all-electric lifting actuators in the spa industry. An amazing Softstart/Softstop™ feature that gives a subtle, almost imperceptible, height adjustment as the table gently whisks clients to the optimal height. Luxurious, practical, low maintenance, durable, and quiet, the Nuage Signature treatment exceeds discriminating spa industry standards.

Shown with optional Salon Headrest and Flex Arms

Nuage Signature

"I have put the Nuage Signature in the Cary Collier Collection, because in my view, it is the most complete, innovative design in treatment tables today."
- Cary Collier, Spa Consultant and Founder of Blu Spas Inc.

Integrated Workstation Trolley - stores neatly underneath table when not in use. The trolley's pop-up top is spring-loaded to glide into working position, and is damped for soft closures. Hot towel cabi ready with PowerPort™ power management system. Ample storage within. Patent Pending.

Whisper silent Electra-Glide™ actuators - features four plug and play, sound proofed, electronically synchronized electric actuators with Softstart/Softstop™ technology.

Electronic, programmable Salon Top - perfect for facials, massage and many other spa treatments.

Ultra-stable cross braced steel frame - patent pending technology for increased strength and stability.
